## SUMMARY

- Computer Science student with experience designing front-end web applications using React and TailwindCSS.
- Skilled in building responsive UI and writing maintainable, well-documented code.
- Passionate about creating user-friendly applications and learning full-stack development.
- Developed strong communication and teamwork skills through extensive experience in collaborative, fast-paced environments.

## WORK EXPERIENCE

### Host

**September 2025 – Present**

The Wave, London, Ontario

- Greet and assist approximately 100 customers per shift, creating a welcoming first impression and a positive dining experience.
- Handle reservations and walk-ins, coordinating with staff to ensure a smooth and efficient workflow.
- Supported special events with guest counts of over 800, to deliver an organized, safe and fun experience.

### Dishwasher

**August 2022 – April 2024**

Ironwood Kitchen + Bar, London, Ontario

- Washed and sanitized approximately 300 dishes, utensils, and kitchen tools per shift, maintaining strict health and safety standards.
- Hired as part of the opening crew, contributing to initial setup, and launch of the restaurant.
- Participated in mock service, ensuring seamless back-of-house operations.
- Proactively supported prep operations, including portioning ingredients and shucking oysters, to improve kitchen efficiency.

## PERSONAL AND PROFESSIONAL PROJECTS

### Punch-in Page

July 2025 – August 2025

MarketDental, Remote, London, Ontario

- Designed a modern punch-in interface in Figma, improving usability and visual appeal for employees.
- Outlined the tech stack and implementation plan.
- Developed the front end using Svelte, JavaScript, Node.js, and TailwindCSS, integrating with the existing backend via Fetch API.
- Wrote clean, comprehensive, and well-documented code to support future maintenance.

### Portfolio Website

June 2025 – Present

samdeitz.ca, London, Ontario

- Designed a Windows-inspired UI in Figma, creating a sleek and modern user experience.
- Structured the technology stack and implementation plan to guide scalable development.
- Developed the front end using ReactJS, TailwindCSS, Node.js, and JavaScript, applying component-based architecture for reusability.
- Implemented React Context to streamline state management and combat prop drilling.
- Applied responsive tactics to ensure a seamless design no matter the size of the screen
- Delivered well-structured, maintainable code, using components, wrappers, and consistent comments for readability and maintainability.

## EDUCATION

### Bachelor of Science, Computer Science,

Expected April 2028

### Minor in Software Engineering

Western University, London, Ontario

- Cumulative average 95% - Dean's Honor List
- Awarded Scholarship of Excellence for ranking among the top 250 incoming students.

## TECHNICAL SKILLS

- **Web Development:**
  - **Proficient In:** HTML, CSS, JavaScript, ReactJS, TailwindCSS
  - **Intermediate:** Figma, Node.js, Svelte
- **Languages:**
  - **Proficient In:** Java, JavaScript, Python
  - **Beginner:** C

## **AWARDS AND SCHOLARSHIPS**

- **Hugh White Scholarship**
  - Awarded upon high school graduation in 2024.
  - Given to 2 individuals for excellence in Math.
- **Award of Excellence**
  - Awarded upon entrance into university.
  - Given for ranking among the top 250 entering students in 2024.
- **Honors in the Canadian Computing Competition**
  - Top performing students in the Junior CCC 2024.
