PROFESSIONAL EXPERIENCE

trACT Software | Full Stack Developer Intern

May 2026 – Present

- Rebuilt and migrated a **9-page marketing site** from Wix and developed **account management and analytics dashboards** using **React, Next.js, TypeScript, and Tailwind CSS**, including permission-based user invitations via **Amazon SES**.
- Designed a **13-collection Payload CMS** and data-access architecture using **Next.js Server Actions and Payload's Local API**, enabling non-technical content updates and server-side data fetching without client HTTP requests.
- Replaced Wix analytics with a custom dashboard integrating **Google Analytics, Google Search Console, and Microsoft Clarity**, and built a **daily cron pipeline** to collect and persist analytics data in **Amazon S3** while handling API rate limits.
- Architected **AWS RDS and S3 infrastructure** within the client's existing AWS environment, consolidating data while eliminating reliance on the **Wix subscription**.

3D Western | Full Stack Developer

May 2026 – Present

- Helped rebuild and integrate an **8-page website** using **React, Next.js, TypeScript, Tailwind CSS, and Radix UI**, integrating CMS-backed content across the application.
- Designed an **18-collection Payload CMS** with **collection-level permissions**, replacing hardcoded content and allowing administrators to control user access and editing rights.
- Built a **config-driven Payload data layer** with reusable fetch methods and **SWR caching**, reducing duplicated API logic and avoiding redundant requests across blogs, projects, and events.
- Automated Instagram content ingestion using a **daily cron job and Meta API**, syncing account data and the **10 latest posts** into Payload.

Childcan (Tethos) | Senior Frontend Developer

October 2025 – March 2026

- Co-led frontend development on a **7-person team**, building complex React features and supporting **5 junior developers** across a **20+ page** website.
- Built a reusable **typed content-rendering system** and **slug-based dynamic routing** for CMS-backed stories and events across a **20+ page Next.js site**.
- Built the responsive header and frontend for a **fuzzy search system**, improving navigation and content discoverability across the site.

PROJECTS

SwingSync | [Source Code](#)

Java | Swing | Maven | Gradle

- Built a Java developer utility that **hot-reloads Swing interfaces** at runtime without restarting the application.
- Used **Java Reflection, custom ClassLoaders, and file watching** to detect compiled code changes, rebuild components, and replace the active UI dynamically.
- Designed a lightweight API requiring only a **JFrame, root JPanel, and constructor parameters**, and published the library on **JitPack** for Maven and Gradle integration.

EDUCATION

Western University

Expected May 2028

BSc Computer Science, Minor in Software Engineering

GPA: 3.95 | Dean's Honor List | Hugh White Scholarship | Award of Excellence

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Systems Programming

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, C, Bash, SQL

Technologies: React, Next.js, Svelte, Tailwind CSS, Payload CMS, PostgreSQL, Supabase

Tools: Git, GitHub, GitLab, Figma

Cloud & DevOps: AWS (EC2, S3, SES, RDS), Vercel, Docker, Nginx, Caddy, Linux
