

SAM DEITZ

| London, Ontario | (519) - 384 - 1661 | samdeitz.ca |

sdeitz@uwo.ca | linkedin.com/in/samdeitz | github.com/samdeitz

SUMMARY

- Computer Science student with experience designing and developing **web applications** using **React**, **Svelte**, **Next.js**, **Typescript** and **TailwindCSS**.
- Experienced with version control (**Github**, **Gitlab**)
- Skilled in building **responsive UI** and writing maintainable, well-documented code.
- Passionate about creating user-friendly applications and learning full-stack development.
- Developed strong communication and teamwork skills through extensive experience in collaborative, fast-paced environments.

WORK EXPERIENCE

Host

September 2025 – Present

The Wave, London, Ontario

- Greet and assist approximately 100 customers per shift, creating a welcoming first impression and a positive dining experience.
- Handle reservations and walk-ins, coordinating with staff to ensure a smooth and efficient workflow.
- Supported special events with guest counts of over 800, to deliver an organized, safe and fun experience.

PERSONAL AND PROFESSIONAL PROJECTS

Childcan Website Redesign

October 2025 – Present

Tethos (Prev. TSI), London, Ontario

- **Senior Developer** on a 5-person team redesigning a non-profit organization's website
- Recreated and redesigned the client's website in **Figma**
- Developing a modern, responsive frontend using **React**, **Next.js**, **TypeScript**, and **TailwindCSS**
- Implemented **dynamic routing with slugs** to support scalable content pages
- Designing components and content structures that **enable non-technical staff to update site content**.
- Implementing content management through **Sanity**

Portfolio Website

June 2025 – Present

samdeitz.ca, London, Ontario

- Designed a Windows-inspired UI in **Figma** for a sleek and modern user experience.
- Developed the front end using **React**, **TailwindCSS** and **JavaScript**, applying component-based architecture for reusability.
- Implemented **React Context** to streamline state management and combat prop drilling.
- Applied **responsive tactics** to ensure a seamless design for all screen sizes
- Created well-structured, maintainable code, using components, wrappers, and consistent comments for readability and maintainability.

Punch-in Page

July 2025 – August 2025

MarketDental, Remote, London, Ontario

- Designed a modern interface in **Figma**, improving usability and visual appeal
- Outlined the tech stack and implementation plan.
- Developed the front end using **Svelte**, **JavaScript**, **Node.js**, and **TailwindCSS**, integrating with the existing backend via **Fetch API**.
- Containerized backend using **docker** to standardize development environment
- Wrote clean, comprehensive, and well-documented code to support future maintenance.

EDUCATION

Bachelor of Science, Computer Science, Minor in Software Engineering

Expected April 2028

Western University, London, Ontario

- Cumulative average 95% - Dean's Honor List
- Awarded Scholarship of Excellence for ranking among the top 250 incoming students.

Awards and Scholarships: Hugh White Scholarship, Award of Excellence, Canadian Computing Competition Honors
